Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-25 and 89, drawn to a method of conditionally controlling the survivability of a recombinant microbial cell population.

Group II, claim(s) 26-32 and 89, drawn to a method of confining an extrachromosomal replicon.

Group III, claim(s) 33-50, drawn to a method of post-segregationally stabilizing a plasmid.

Group IV, claim(s) 51-79 and 87-88, drawn to cells.

Group V, claim(s) 80-83 and 89, drawn to a method of limiting the survival of a cell population in a first or second environment.

Group VI, claim(s) 84-85 and 89, drawn to a method of containing an extrachromosomal recombinant replicon to a first kind of cell.

Group VII, claim(s) 86 and 89, drawn to a method of stochastically limiting the survival of a cell population.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The unique special technical feature of the claims of Group I, is disclosed by US Patent Number 5,670,370. The '370 patent discloses a nucleotide sequence encoding a cell killing function which is regulatably expressed when the replicon is harboured in a host cell. (See abstract). Given that this replicon serves the same function for killing cells in a cell population it is deemed to be a functional equivalent of the claimed gene encoding a ReLE polypeptide. Accordingly, the unique special technical feature of the claimed invention is found to be lacking, and restriction to the different groups is appropriate.

Art Unit: 1645

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
